

WORKSHOP ON INTERNAL AUDITING

Date : June 19, 2010 (Saturday)

Time : 9:00 am – 5:00 pm

Venue : Institute of Chartered Accountants of Pakistan, Clifton, Karachi

Internal auditors are increasingly being asked to provide assurance on a wide variety of business areas and operations, yet their budgets are rarely increased to facilitate the achievement of this. We, as Internal Auditors, therefore often need to deliver more assurance with the same or less resource. Moreover, there are clear challenges to internal auditors from the board, audit committee and senior management to demonstrate the value they provide to the organization.

Key to achieving this is to adopt an approach that covers key business issues whilst delivering our work efficiently and effectively. This one day course will enable you to deliver assurance on the issues that really matter to your organization by developing an effective internal audit approach and managing the internal audit function in a result-oriented manner.

Workshop Outline

- Foundations of Internal Auditing
- Types of Internal Audits
- Managing Internal Audit
- Planning and Risk Assessment
- Audit Programme and Procedures (including CAATs)
- Audit Work Papers
- Audit Reports and Communication
- Relationship Management
- Case Study - to provide workshop participants an opportunity to apply IA concepts related to risk assessment, controls evaluation, compliance testing and substantive testing.
